Testing Python Kelompok C

Monitoring Level Tangki

Seluruh input berupa bilangan bulat dalam domain 0-100 % (selisih uji = 1 dari batas). Expected ditentukan dari aturan soal: level < 30 = LOW; 30 <= level <= 80 = NORMAL; level > 80 = HIGH. Actual adalah hasil pemanggilan function pada main.py.

No	Input	Expected	Actual	Hasil
1	status_level(29)	LOW (tepat di bawah batas 30)	LOW	PASS
2	status_level(30)	NORMAL (tepat pada batas 30)	NORMAL	PASS
3	status_level(31)	NORMAL (sedikit di atas batas 30)	NORMAL	PASS
4	status_level(79)	NORMAL (sedikit di bawah batas 80)	NORMAL	PASS
5	status_level(80)	NORMAL (tepat pada batas 80)	NORMAL	PASS
6	status_level(81)	HIGH (sedikit di atas batas 80)	HIGH	PASS
7	status_level(5)	LOW (nilai rendah realistis)	LOW	PASS
8	status_level(95)	HIGH (nilai tinggi realistis)	HIGH	PASS
9	hitung_kategori([LOW, NORMAL, NORMAL, HIGH])	LOW=1, NORMAL=2, HIGH=1	{'LOW': 1, 'NORMAL': 2, 'HIGH': 1}	PASS
10	rata_rata([20, 40, 60])	40.0	40.0	PASS

Bukti output terminal (gabungan)

```
Test 01: status_level(29) -> LOW  [PASS]
Test 02: status_level(30) -> NORMAL  [PASS]
Test 03: status_level(31) -> NORMAL  [PASS]
Test 04: status_level(79) -> NORMAL  [PASS]
Test 05: status_level(80) -> NORMAL  [PASS]
Test 06: status_level(81) -> HIGH  [PASS]
Test 07: status_level(5) -> LOW  [PASS]
Test 08: status_level(95) -> HIGH  [PASS]
Test 09: hitung_kategori([LOW, NORMAL, NORMAL, HIGH]) -> {'LOW': 1, 'NORMAL': 2, 'HIGH': 1}  [PASS]
Test 10: rata_rata([20, 40, 60]) -> 40.0  [PASS]

Total: 10 PASS dari 10 test
```
